Subject: RE: Autocad files

Elizabeth,

I have CC'd Eric and Rebecca of Philly Trans, LLC. They are the ones we are providing the electronic files to. As stated in my earlier email to you, please forward the converted Autocad files as well as the KMZ/KML files. As this is time sensitive, please make it a priority for tomorrow morning (to the extent possible.....)

Eric and Rebecca, just as an FYI... the GIS folks at Weston indicated that there can be compatibility issues with the converted files and certain versions of autocad. I have to admit, most of it is greek to me. They recommended the KMZ/KML files... So I asked for both. Hopefully your contractor is familiar with the potential issues and can adjust accordingly.

Eric and Rebecca (and Elizabeth of course). I am on furlough tomorrow and cannot respond to additional requests or variations of this one. Elizabeth (filling in for Tom who is out this week) is not able to incur additional work on this project without my authorization.... As such, and I'm sure you understand, please don't make any requests of her or Weston. All requests must go through me.

I will certainly be checking emails on Thursday and can respond then.. Hopefully these fit your needs.

Thanks in advance,

Myles
